- English

## EXPERIENCE

**Internship at Safehorizons company.**

July 2024

- Conducted the development and design of a data management system, including database design, API creation.
- Collaborated with the team to gather requirements and contribute to the design of user-friendly interfaces.
- Supported senior developers by testing and debugging software, identifying issues, and helping to implement fixes.
- Documented code and assisted in creating user guides and technical documentation.

**Teaching Assistant at Mirai Japanese**

June 2022

- Supported instructors in classroom activities, including assisting students with language exercises and providing one-on-one guidance.
- Monitored student progress, helping to assess their language proficiency and providing feedback to both students and instructors.

## PROJECT

**Personal Project - Flutter Task Manager**

- Developed a task management mobile application using Flutter, allowing users to create,

update, and delete tasks with deadlines.

- Integrated Firebase for real-time data storage and user authentication.
- Implemented push notifications using Firebase Cloud Messaging to remind users of upcoming tasks.
- Designed a responsive and intuitive UI to enhance user experience.

#### ***Group Project - Java E-commerce Platform***

- Implemented RESTful APIs for communication between front-end and back-end services.
- Led a team to develop an e-commerce web application using Java Spring Boot, providing features like product browsing, shopping cart, and order management.

#### ***Group Project - Java Inventory Management System***

- Implemented key features such as inventory tracking, order processing, and supplier management, allowing businesses to automate and streamline their operations.
- Integrated a RESTful API to enable third-party applications to access inventory data, providing flexibility and interoperability.
