

# Phuoc Phan

Angular developer - 3 Years of Experience

## CAREER OBJECTIVE

Experienced Angular Developer with a proven track record of 3 years in creating compelling web applications. Eager to bring my robust expertise in Angular and TypeScript to a dynamic team, dedicated to delivering efficient solutions and exceptional user experiences.

## BASIC INFORMATION

Birthday	20/10/2000
Nationality	Vietnamese
Marital Status	Single
Gender	Male

## CONTACT ME

	phuocp.20.10@gmail.com
	+84393134090
	Huong Vinh, Huong Tra, Thua Thien Hue, Vietnam

## WORK HISTORY

**2024**      **Fullstack Developer**  
DataHouse Asia  
03/2023 - Current (11 months)

### 1. Project: Tax Management System

- **Brief description:** The Tax Management System is a comprehensive solution for tax administration, offering efficient tools for managing and processing tax-related data. It enables real-time data analysis, reporting, and automated tax calculations, aiding in optimizing tax resources, ensuring compliance, and making well-informed tax-related decisions.

- **Project type:** Web application

- **Position:** Full Stack Developer

- **Responsibility:** As a Full Stack Developer, I was responsible for designing, developing, and maintaining the Tax Management System. I managed both the front-end and back-end aspects of the application.

- **Technology:** C# ASP.NET, Angular, Angular Material, Azure Services(Functions, Service Bus, Blob Storage,...), RxJS

In the Tax Management System (TMS) project, I undertook various responsibilities related to tax management and web application development. This project focused on enhancing tax-related processes, ensuring compliance, and optimizing resource allocation for tax purposes. My notable contributions to the project included:

- **Handling large files:** Managed large data processing tasks efficiently by transitioning from traditional HTTP methods to leveraging Azure Functions, Azure Service Bus, and Azure Blob Storage. Improved processing speed and eliminated "request timeout" errors by storing and batching a file with up to 300,000 records in Azure Blob Storage.

- **Bug fixing and new feature development:** Besides tackling the technical challenge above, I also took on responsibilities for debugging and developing new features based on business requirements. This included identifying and resolving system issues and developing new features to enhance functionality and value for users and the business.

### 2. Project: ERP system

- **Brief description:** ERP (Enterprise Resource Planning) is a comprehensive software system that efficiently integrates and manages key business processes such as finance, human resources, and customer management. It provides real-time data, optimizes communication between departments, and enhances overall performance,

supporting decision-making through data analysis.

- **Project type:** Web application

- **Position:** Front-end developer

- **Responsibility:** As a Front-end developer, I was responsible for designing, developing, and maintaining the ERP System

- **Technology:** Nestjs, Reactjs

In the ERP (Enterprise Resource Planning) System project, I assumed various roles related to ERP system management and web application development. The project aimed to optimize business processes, ensure compliance, and streamline resource allocation for enhanced ERP functionality. Key contributions to the project included:

**Feature Development and Bug Fixing:**

- Developed new features aligned with business requirements, enhancing overall system functionality and providing increased value for users and the organization.
- Addressed system issues through diligent bug fixing.

2023

**Front End Developer**

Geneat

03/2021 - 02/2023 (1 year 11 months)

- Developed and maintained web applications using Angular, ensuring stability and high performance.
- Built and optimized components, services, and modules to meet technical requirements and page load times.
- Contributed to UI/UX design and crafted user-friendly and interactive templates.

**1. Project Name: inmergers.com**

- **Brief description:** INMERGERS is an Innovative platform for international investment, applying auto-matching technology to connect Buyers with Sellers to carry out transactions of M&A, transferring and leasing properties, brand franchising, distribution/agent, and original equipment manufacturer.

- **Project type:** Web application

- **Position:** Frontend Developer

- **Responsibility:** In the INMERGERS, I used custom interfaces and classes to construct and manage forms, tables, editors,... This facilitated the creation of an efficient and easily manageable generation process. By employing this approach, for example I had the capability to swiftly generate form fields, establish data validation rules, and customize the display of form components to meet specific project requirements. Utilizing this approach, I reduced development time and optimized system maintainability, all the while ensuring consistency in the user interface of the application. This method created a conducive environment for collaboration with other team members and the efficient management and expansion of features within the project.

- **Technology:** Angular, tailwindcss, Antd, ASP.NET

**2. Project Name: Mipak ADMIN**

- **Brief description:** Operational management software (internal) in the packaging industry automates production, inventory, quality control, supply chain, and logistics operations to optimize resources, increase efficiency, and provide real-time insights for informed decision-making. It helps track production and delivery, manage inventory, analyze data, and generate reports.

- **Project type:** Web application

- **Position:** Frontend Developer

- **Responsibility:** Led the development of a new application from the ground up, leveraging pre-existing codes and components from the Inmergers project. Played a key role in designing, coding, and refining the application. Training and guidance on knowledge and skills Expertise for New Developers.

- **Technology:** Angular, tailwindcss, Antd, ASP.NET

**3. Other project:** Padwise, ebay-admin, isoft, 3D-B2C, SCN, Inmergers Global...

**EDUCATION**

2022

**Infomaion Technology**

Bachelors - HUE UNIVERSITY OF SCIENCES

06/2018 - 06/2022 (4 years)

## LANGUAGES

English - Advanced

## SKILLS

Angular 5+, Linux, English, Problem Solving, Quality Assurance, C#, ASP.NET, SQL, Git, Agile, JavaScript, Typescript, Teamwork, AngularJS
